

A2HACKFEST 2025

QRAPTOR LAUNCH, INDUSTRY INSIGHTS, AND AGENTIC AI INNOVATION

ABOUT A2HACKFEST

A2HackFest 2025 brought together 1,500+ participants from 100+ colleges and corporates, with 270 shortlisted innovators building real-world AI solutions in a week-long hackathon powered by qRaptor.

Participants tackled diverse challenges — from elderly care and farming to healthcare, marketing, and daily commutes — showcasing how Agentic AI delivers scalable, impactful solutions that validate qRaptor's potential.

Launch of qRaptor—Where eXperience Meets eXecution

qRaptor is the world's first production ready agent-native AI app builder, designed to let teams create, orchestrate, and deploy intelligent apps at speed — combining low-code and vibe-code simplicity with agentic depth. It's where eXecution meets eXperience, empowering both innovation and scale.

FOUNDER'S KEYNOTE

Company Vision & qRaptor Launch

Founded **AugmentAppz** to solve the gap between tools that handle either execution OR experience, but never both together

Launched qRaptor - an agent-native platform where "**execution and experience come together by design**" for production-ready applications

PERSONAL LIFE LESSONS

- From his mother: "Be kind not for others but for your own peace"
- From his father: "Never give up" - continuous learning at any age
- From mentor Jothi: "Results count, but people matter the most"
- Personal insight: "Make your own trend, don't focus on mistakes others point out"

“

For me, everyone who participated is a winner because you people have attempted something and tried to bring out what you thought as a solution. Your **innovation** and **effort matter** more than just winning, and thank you for making AugmentAppz's first event special

”

CELEBRATING TALENT: AWARDS IN FIVE POWER-PACKED SEGMENTS

A2HackFest brought together brilliant minds from across the country, competing to build domain-specific AI agent solutions using qRaptor.

Metro Companion on WhatsApp

A WhatsApp-based metro assistant that complements m-Indicator and Yatri by bringing route planning, station info, and live timetables – right inside the app people already use

Team Name: TEAM INSPIRE

GRAND WINNER & AUDIENCE FAVOURITE

1ST RUNNER UP

SupportXpert: AI-Driven Service Assistant

Combines intelligent chatbots, AI recommendations, and historical resolution mining to improve both customer experience and support engineer productivity

Team Name: Error404

2ND RUNNER UP

MOST TECHNICAL AWARD

Fitpal: Elderly Health Companion

A robust multi-agent system with live vitals tracking and early risk detection – built with qRaptor's drag-and-drop dashboard and future-ready device integration.

Team Name: Zero Lag

MOST INNOVATIVE AWARD

LabMateAI: The Smart Lab Assistant

An agent that helps biologists track experiments, visualize progress, retrieve protocols, answer queries, and guide troubleshooting – all in one dynamic interface.

Team Name: LabMateAI

Panel Recap: From Outsourcing to AI-Sourcing

One of the most anticipated sessions at A2HackFest 2025 was the industry panel titled **"From Outsourcing to AI-Sourcing."** Featuring veterans from IT services, product innovation, and digital transformation, the discussion offered powerful perspectives on how AI agents are reshaping global delivery models.

Duraivel Gopal – Business Leader

- Efficiency, flexibility, cost, GTM speed — these will now be driven by Human + AI, not just humans alone.
- We should start small and evolve — as humans always do.
- From a business user's perspective, AI is no longer a tech ask — it's an outcome expectation.

Jothiganesh Nagarajan – COO, Astreya

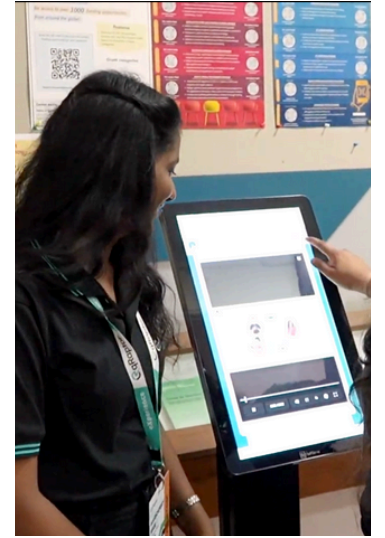

- AI isn't disrupting outsourcing — it's evolving it toward intelligent augmentation.
- Roles will shift: some disappear, others evolve, new ones emerge (AI trainers, validators, ethical auditors).
- Successful AI adoption requires: the right platform (like qRaptor), clean data, skilled people, governance, and change management.

Anil bhat – CTO, Mage Data

- Partnership Evolution: AI augments humans, shifting from effort-driven outsourcing to outcome-focused partnerships
- Human Validation Required: AI needs oversight; success depends on clearly defining requirements
- Data Foundation: Robust, unbiased data with intelligent privacy masking is critical for AI systems

Apart from the hacking, the event featured **team games** and **interactive activities**, bringing laughter, bonding, and competitive spirit to the fore. Every attendee left with a memory — not just of the code they wrote, but of the experience they lived.

Wall of Fame

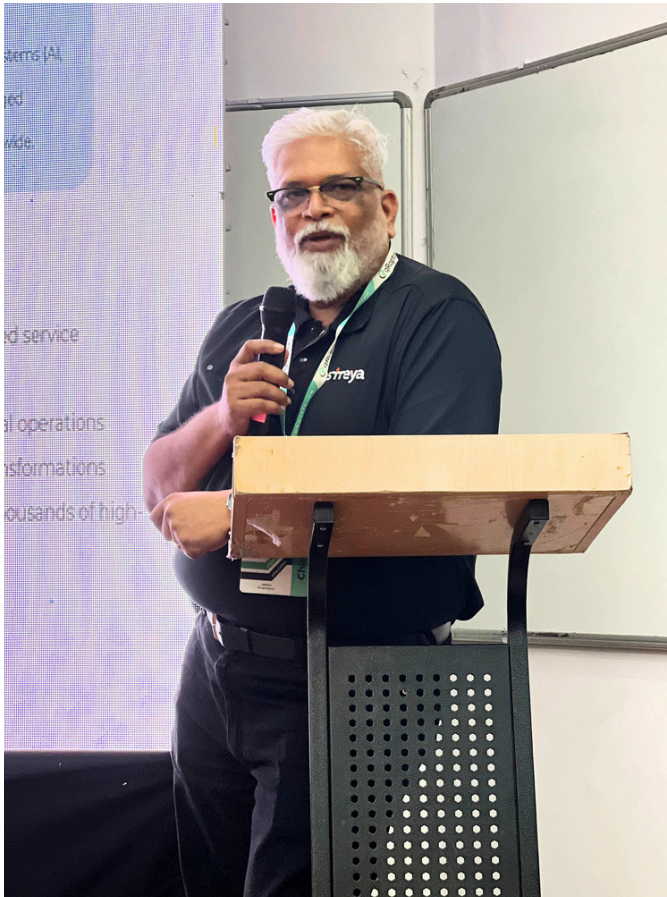

2025

Fireside Wisdom: Chief Guest Insights

Inspiration, Innovation, and Industry Vision

Our distinguished chief guests brought a wealth of insight and inspiration to A2HackFest 2025. From the role of youth and local innovation to the synergy between platforms and enterprise needs, each guest delivered powerful messages that resonated deeply with participants and leaders alike.

Jothiganesh Nagarajan – COO, Astreya

- qRaptor is a fast, reliable, and feature-rich platform — a true game changer in the Agentic AI world.
- It's not about how big or small the idea is, but the impact it creates and the volume it reaches.

Anil Bhat – CTO, Mage Data

- Solving local problems with AI is the kind of innovation India truly needs right now.
- Data privacy and security must be at the core of every AI solution.

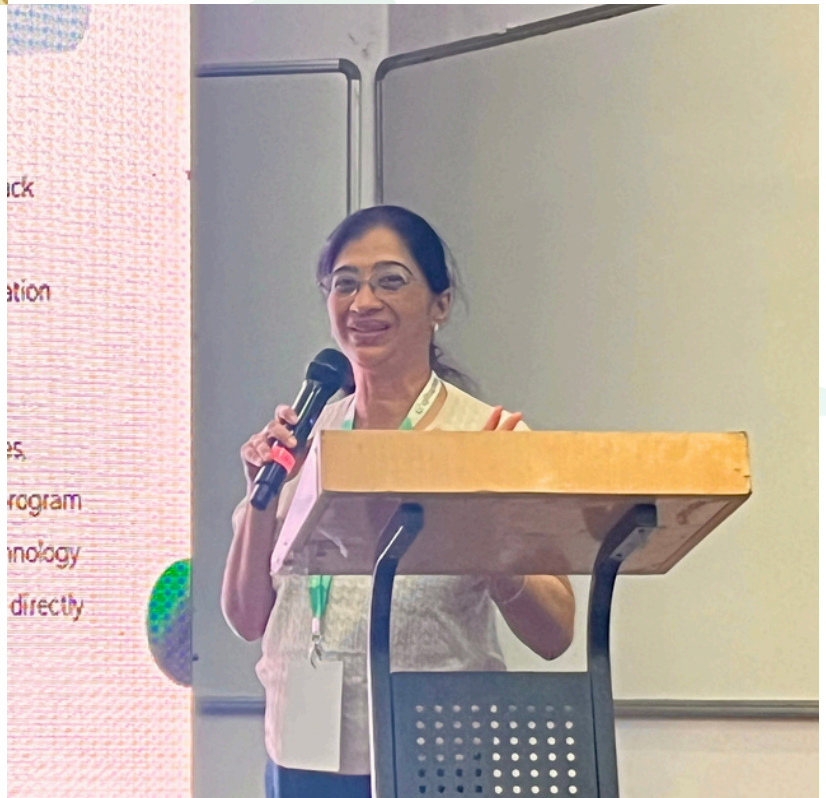

Duraivel Gopal – Business Leader, IT Services

AI will expand the user base — not displace it — by becoming a true human companion.

We need more people who can connect business needs with technology possibilities.

Sita K M – L&D Head, Capgemini

- The future belongs to the youth — their thinking will shape tomorrow's growth.
- We need innovation that bridges the gap between citizens and technology.

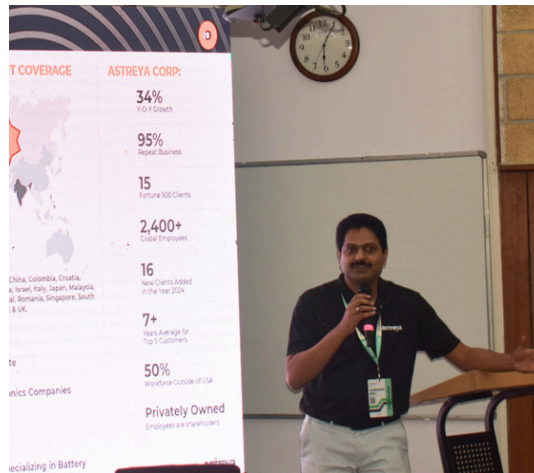

Your innovation matters! Connect with qRaptor on social media to stay updated on our latest AI agent developments, platform features, and community events. Share your Agent Native App journey with us using the hashtag **#buildwithqRaptor.**

PRANJAL JAYACHANDRA, VP – CROSS FUNCTIONAL SERVICES, ASTREYA

Scaling Agentic Innovation, Together

Astreya is a Silicon Valley-based technology services leader serving global enterprises since **2001**. Specializing in Cloud, Network, Digital Workplace, and AI-Driven Services, they maintain a **95%** customer retention rate while powering critical infrastructure for the world's largest companies.

He outlined **Astreya's enterprise transformation through their 3x3 service model:**

CIS – Cloud, Infrastructure & Security

EAS – Enterprise AI Services

DWS – Digital Workplace Services

Key flagship IPs powering this transformation include:

- Prognasys
- Automation RMC
- Process Intelligence Framework
- Digital Orchestrator
- FS Capacity Manager
- AI WorkHub (for ITOps & Software Engineering)
- and IT Data Insights Framework

qRaptor: Preferred AI Partner

“

qRaptor is our preferred AI build partner — fast, flexible, and aligned with how enterprises want to deploy Agentic AI.

”

Astreya has chosen **qRaptor** as one of its trusted AI Partners — working closely to bring agent-native apps into real-world enterprise use cases. Together, they are enabling scalable, secure, and outcome-focused AI ecosystems for clients worldwide.

ECOSYSTEM SUPPORT: INSIGHTS FROM SPONSORS & PARTNERS

Global Edifice

is a Bangalore-based real estate developer with over 10 years of experience specializing in premium apartments and gated communities, recognized for quality construction and customer-centric service.

After Earth

A sustainable gifting company focused on eco-friendly and plastic-free handcrafted gifts.

Go SelfServe

Provides interactive digital kiosks and displays for cashless shopping at retail stores and banks.
